

DOSIMETRIA ANUAL RELATIVA DE PDDS Y PERFILES DE DOSIS 2024

ACELERADOR ELEKTA SYNERGY PLATFORM SN:153870

Equipamiento utilizado: Fantoma Automático IBA BluePhantom2 SN:15800. Electrómetro IBA CCU SN:23261.

Dosis medida comparada con la dosis calculada en TPS Monaco:

Tamaño de grilla: 0.3 cm (fotones) - 0.1 cm (campos pequeños/electrones).

Incerteza estadística: 0.1% (fotones) - Nro de historias/cm2: 1M (electrones).

Se realiza análisis Gamma Index con parámetros: Dosis de acuerdo: 2.0 % - Distancia de acuerdo: 2.0 mm

| Equipo | Fecha | Detector/SN | Partícula | E_MV/MeV | SSD_cm | TC_cm | Eje | Prof_mm | Gamma_pass | Tolerancia |
|----------|------------|-------------|------------|----------|--------|-------|-----|---------|------------|------------|
